

PINK | Simplify Health Care ETF

FUND OVERVIEW

The **Simplify Health Care ETF (PINK)** seeks long-term capital appreciation by providing investors with multi-cap exposure to groundbreaking and innovative companies in biotech, medtech, gene therapy, and other fast-growing health care-related sectors.

Michael Taylor serves as lead portfolio manager of the ETF and brings over two decades of experience managing long/short health care equity portfolios at leading hedge funds. PINK is the first 100% pro bono ETF focused on the health care sector and net profits will be donated for the benefit of the Susan G. Komen Foundation on an annual basis.

PERFORMANCE REVIEW

Since its inception, PINK has delivered impressive performance, surpassing the MSCI USA IMI Health Care Net Total Return Index by 14.91% cumulatively, or 4.23% on an annualized basis.

In the fourth quarter, PINK outperformed the benchmark by 0.41%. Key contributors to this outperformance included Arcutis Biotherapeutics, PureCycle Technologies, and Gilead Sciences. However, relative performance was tempered by the impact of Regeneron, Cigna, and Myriad Genetics.

PINK also took proactive measures to safeguard investor value by reducing exposure to underperformers such as Pfizer, Bristol-Myers Squibb, and CVS Health. This disciplined approach underscores our commitment to maintaining a highly idiosyncratic portfolio relative to the MSCI Health Care Index.

As we enter 2025, we are optimistic about the health care sector's prospects. We anticipate that, as election-driven rhetoric diminishes, the sector can refocus on fundamentals, presenting potential opportunities for growth.

Performance as of 12/31/24 | Inception Date: 10/07/21

	CUMULATIVE TOTAL RETURN				ANNUALIZED TOTAL RETURN	
	3 Mo	6 Mo	YTD	Since Inception	1 Year	Since Inception

DEFINITIONS

Market Price: The current price at which shares are bought and sold. Market returns are based upon the last trade price.

MSCI USA IMI Health Care Net Total Return USD Index: Designed to capture the large and mid cap segments of the US equity universe. All securities in the index are classified in the Health Care sector as per the Global Industry Classification Standard (GICS®).

NAV: The dollar value of a single share, based on the value of the underlying assets of the fund minus its liabilities, divided by the number of shares outstanding. Calculated at the end of each business day.

SEC 30-Day Yield: The yield is calculated with a standardized formula and represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price. The yield includes the effect of any fee waivers and/or reimbursements. Without waivers, yields would be reduced. This is also referred to as the "standardized yield", "30-Day Yield" and "Current Yield". The unsubsidized SEC 30-Day Yield does not reflect the effect of any fee waivers and/or expense reimbursements.

IMPORTANT INFORMATION:

Investors should carefully consider the investment objectives, risks, charges, and expenses of Exchange Traded Funds (ETFs) before investing. To obtain an ETF's prospectus or Summary prospectus containing this and other important information, please call (855) 772-8488, or visit SimplifyETFs.com. Please read the prospectus carefully before you invest.

An investment in the fund involves risk, including possible loss of principal.

The fund is actively-managed is subject to the risk that the strategy may not produce the intended results.

The Fund focuses its investments in securities of biotechnology and the healthcare industry. Economic, legislative or regulatory developments may occur that significantly affect these industries and cause the Fund's net asset value to fluctuate due to this concentration.

The biotechnology industry can be significantly affected by patent considerations, including the termination of patent protections for products, intense competition both domestically and internationally, rapid technological change and obsolescence, government regulation and expensive insurance costs due to the risk of product liability lawsuits.

In addition, the biotechnology industry is an emerging growth industry, and therefore biotechnology companies may be thinly capitalized have limited product lines, distribution channels, resources and more volatile than companies with greater capitalizations. Biotechnology companies must contend with high development costs, which may be exacerbated by the inability to raise prices to cover costs because of managed care pressure, government regulation or price controls. Companies in the pharmaceutical industry are heavily dependent on patent protection. The expiration of patents may adversely affect the profitability of the companies. Pharmaceutical companies are also subject to extensive litigation based liability and approval of the Food and Drug Administration, a process that can be long and costly. Expanding international operations may lead to risks resulting from differences between U.S. and foreign legal, political and economic systems, regulatory regimes and market practices.

The Fund's focus on the healthcare sector may cause its value to fluctuate and be more susceptible to particular risks of the sector such as extensive government regulations, restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure, an increased emphasis on outpatient services, changes in the demand for medical products and services, a limited number of products, industry innovation, changes in technologies and other market developments.
