**Part II Organizational Action** Attach additional statements if needed. See back of form for additional questions.

**14** Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶ Shareholders in the Simplify MBS ETF ("ETF") as of the record date(s) on attached Statement A, received a distribution(s) as detailed on attached Statement A. The ETF has determined that it's Accumulated Earnings and Profit ("E&P") for the tax year ended June 30, 2025, was insufficient to support the distribution(s) as a dividend (taxable) under Section 301(c) of the Internal Revenue Code of 1986, as amended. As a result, a percentage (as detailed on Attachment A) of the distribution(s) paid during the calendar year 2025 have been re-characterized from a dividend to a non-dividend Return of Capital ("ROC"). The ROC characterization of the distribution(s) means that ETF record date shareholder(s) should characterize, for tax purposes, the percentage (as detailed on Attachment A) of the distribution(s) received as non-taxable return of capital. Shareholder(s) should reduce the tax basis in their share(s) of the ETF by the amount of the distribution(s) designated as ROC.

**15** Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ The portion of the distribution characterized as non-dividend Return of Capital ("ROC"), as described in Part II - line 14, should be applied against and reduce the shareholder(s) adjusted tax basis in their share(s) of the ETF as of the distribution(s) date(s). To the extent any portion of the distribution(s) characterized as ROC paid with respect to a share(s) of the ETF exceeds the shareholder(s) adjusted tax basis in that share(s), the excess portion is recognized as a capital gain. See Attachment A for details on the tax character of distribution(s) per-share by record date.

**16** Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ At the time of the distribution detailed in Attachment A, the ETF's tax year had not closed so the ETFs E&P and therefore the final tax character of the distribution(s) could not be determined. At this time, the ETF has determined that its E&P for the 6/30/25 tax year was insufficient to support the distribution(s) as a taxable dividend under IRC 301(c). As a result, a percentage (as detailed on Attachment A) of the distribution(s) paid during the calendar year 2025 have been characterized as a non-dividend Return of Capital ("ROC"). The ROC represents a percentage (as detailed on Attachment A) of the total distribution(s) paid during the calendar year 2025. As a result, ETF shareholder(s) (as of the record date(s) in Attachment A) adjusted tax basis in their share(s) is decreased by the Return of Capital ("ROC") with respect that share(s) under IRC 301(c)(2). Any portion of a ROC distribution(s), to the extent it exceeds the shareholder(s) tax basis is taxable as a capital gain. Attachment A provides details on the tax character of distribution(s) per-share by record date.

**Part II Organizational Action** (continued)

17 List the applicable Internal Revenue Code section(s) and subsection(s) upon which the tax treatment is based ▶ \_\_\_\_\_

19 Provide any other information necessary to implement the adjustment, such as the reportable tax year ▶ \_\_\_\_\_
