SIMPLIFY ETFs

Simplify Model Portfolios

Thoughtfully combining institutional investment techniques to modernize traditional risk-based portfolios.

INSTITUTIONAL USE ONLY

Simplifying Portfolio Construction

Objective-based model portfolios from Simplify

Access to Simplify's institutional alternative and active strategies

Simplify's risk-based approach to portfolio construction thoughtfully combines outcome-oriented, active, and factor-based strategies with traditional beta to provide investors with differentiated solutions to navigate evolving markets.

Objective-Built Portfolios

Thoughtfully designed portfolios take an objective-based lens to asset allocation, ensuring optimized exposure across the risk spectrum.

+

Active, Risk-Aware

The inclusion of actively managed strategies provides both alpha and risk-mitigation – a key investment philosophy of the firm.

+

Institutional Alternatives

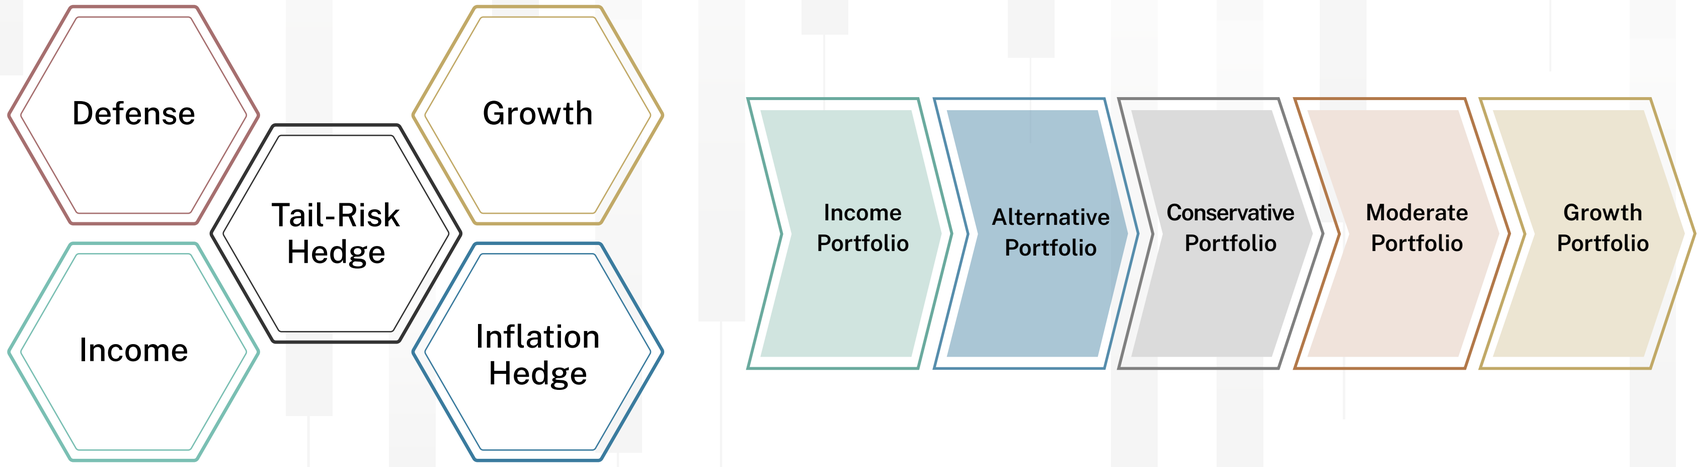

Liquid alternatives provide diversified sources of risk and return beyond traditional market beta, allowing portfolios to weather various market environments.

Institutional, Objective-Based Portfolio Construction

Simplify's objective-based framework drives outcome-oriented portfolios across desired risk profiles with a differentiated investment process that:

- Looks beyond asset class labels to understand the key drivers of investment risk
- Follows an institutional approach to allow for greater flexibility and more tailored exposures across the risk spectrum

Investment Objectives → Multi-Asset Models → Key Investor Benefits

- ✓ Access to alternative sources of risk and return
- ✓ Enhanced diversification to traditional markets
- ✓ Enhanced income
- ✓ Drawdown protection

Definitions

Alternative Model Portfolio: Primarily centered on non-traditional investment strategies, with a focus on diversifying return sources and improving risk-adjusted outcomes beyond those of traditional stock and bond portfolios.

Conservative Model Portfolio: Generally emphasizes capital preservation and lower volatility, with selective use of alternative strategies to support improved risk-adjusted returns.

Growth Model Portfolio: Primarily prioritizes long-term capital appreciation, with alternative strategies incorporated to diversify return drivers and improve risk-adjusted outcomes.

Income Model Portfolio: Typically focused on income generation and risk management, with alternative strategies incorporated to enhance risk-adjusted returns beyond traditional stock and bond investments.

Moderate Model Portfolio: Typically balances growth and risk management, with alternative strategies added to enhance diversification and risk-adjusted returns.

Disclosures

The model portfolios included in this presentation are for example purposes only and do not represent an actual account or the result of any actual trading.
The ETFs used within the models involve risks including the possible loss of principal. There is no guarantee that the allocation of ETFs in certain percentages will result in the demonstrated model objectives of Conservative, Moderate, Growth and Income.Actual investment outcomes will vary and cannot account for the impact of financial risk in actual trading.

Hypothetical model results have many inherent limitations, some of which, but not all, are described herein. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight.The performance of the model portfolios will be affected by the costs of ownership or trading costs, (such as brokerage fees and commissions) and any possible impact of inflation plus fees and expenses of the individual ETFs. Frequent trading of ETFs to maintain certain model allocations may incur charges that erode cost efficiency and performance.

An investment in Exchange Traded Funds (ETFs) involves risk, including possible loss of principal. Investors should carefully consider the investment objectives, risks, charges and expenses of ETFs before investing. To obtain an ETF's prospectus containing this and other important information, please call (855) 772-8488 or view/download a prospectus online at simplify.us/etfs. Please read the prospectus carefully before you invest.

The performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. For performance data current to the most recent month-end please call (855) 772-8488 or go to simplify.us/etfs.
