Simplify Aggregate Bond PLUS Credit Hedge ETF

AGGH

Supplement dated August 29, 2023 to the Prospectus and Summary Prospectus dated October 28, 2022, and to the Statement of Additional Information ("SAI") dated January 18, 2023

Effective 60 days from the date of this Supplement, the Fund's objective is revised as follows:

The Fund seeks to maximize total return.

Effective immediately, the Fund's name is changed to "Simplify Aggregate Bond ETF" and the following sections of the Fund's Prospectus and Summary Prospectus have been supplemented or restated, as shown below.

The disclosure under the paragraph heading "**Portfolio Managers**" on page 78 in the Fund's Prospectus and page 5 of the Summary Prospectus is replaced in its entirety with the following:

Portfolio Managers: Paul Kim, Chief Executive Officer of the Adviser and David Berns, Chief Investment Officer of the Adviser, have each served the Fund as a portfolio manager since it commenced operations in February 2022. Shailesh Gupta, Portfolio Manager and Head of Trading for the adviser has served the Fund as a portfolio manager since August 2023. Mr. Kim, Mr. Berns, and Mr. Gupta are jointly and primarily responsible for the management of the Fund.

The fifth sentence of the section entitled "**PORTFOLIO MANAGERS**" on page 35 of the SAI is revised as follows:

Paul Kim, Shailesh Gupta, and David Berns serve as the portfolio managers of the Simplify Intermediate Term Treasury Futures Strategy ETF and Simplify Aggregate Bond PLUS Credit Hedge ETF.

The Fund's Statement of Additional Information provides additional information about the Portfolio Managers' compensation structure, other accounts managed by the Portfolio Managers, and the Portfolio Managers' ownership of shares of the Fund.

***

This Supplement dated August 29, 2023, provide relevant information for all shareholders and should be retained for future reference. The Fund's Prospectus and Statement of Additional Information have been filed with the Securities and Exchange Commission, are incorporated by reference, and can be obtained without charge by calling 1 (855) 772-8488.

phone: 1 (855) 772-8488

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. The Fund's prospectus and statement of additional information dated October 28, 2022, are incorporated by reference into this summary prospectus. You can obtain these documents and other information about the Fund online at www.simplify.us/etfs or by calling 1-855-772-8488.

These securities have not been approved or disapproved by the Securities and Exchange Commission nor has the Securities and Exchange Commission passed upon the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Shares of the Fund are listed and traded on the NYSE Arca, Inc.

FUND SUMMARY - SIMPLIFY AGGREGATE BOND PLUS CREDIT HEDGE ETF

Investment Objective: Simplify Aggregate Bond PLUS Credit Hedge ETF (the “Fund” or “AGGH”) seeks to maximize total return by investing primarily in investment grade bonds while mitigating credit risk.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy, sell, and hold shares of the Fund. Investors purchasing or selling shares of the Fund in the secondary market may be subject to costs (including customary brokerage commissions) charged by their broker. These costs are not included in the expense example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.50%
Distribution and Service (12b-1) Fees	0.00%
Acquired Fund Fees and Expenses(1)	0.05%
Total Annual Fund Operating Expenses	0.55%
Fee Waiver and Reimbursement(2)	(0.25)%
Total Annual Fund Operating Expenses After Fee Waiver	0.30%

(1) Acquired Fund Fees and Expenses, which are estimated for the Fund’s initial fiscal period, are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.

(2) The Fund’s adviser has contractually agreed, until at least October 31, 2023, to waive its management fees and/or pay or absorb the Fund’s expenses, in order to limit the amount of “Specified Expenses” borne by the Fund to 0.25% of the Fund’s average daily net assets. “Specified Expenses” means all ordinary operating expenses of the Fund including management fees, except for interest expenses, taxes, brokerage expenses, Rule 12b-1 fees (if any), acquired fund fees and expenses, and expenses incidental to a meeting of the Fund’s shareholders. The fee waiver is subject to recoupment if such recoupment can be achieved within the lesser of the foregoing expense limits or those in place at the time of recapture. Any waived fees may only be recouped within three years from the date when the amount was waived or reimbursed. This agreement may be terminated only by the Trust’s Board of Trustees on 60 days’ written notice to the Fund’s adviser.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in mutual funds and other exchange traded funds.

The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

1 Year	**3 Years**
$31	$151

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the period February 14, 2022 (commencement of operations) through June 30, 2022, the Fund’s portfolio turnover rate was 14% of the average value of its portfolio.

Principal Investment Strategies: The adviser seeks to achieve the Fund's investment objective by investing in investment grade bonds primarily by purchasing exchange traded funds and applying a credit hedge overlay to the Fund's investments.

Bond Strategy

The Fund has adopted a non-fundamental investment policy that, under normal circumstances, the Fund will invest at least 80% of its net assets (plus any borrowings for investment purposes) in U.S. investment grade bonds primarily by purchasing exchange traded funds ("ETFs").

The Fund pursues its strategy primarily by purchasing ETFs that invest principally in the U.S. investment grade bonds. The adviser does not frequently trade securities but seeks to maintain consistent exposure to such companies through its investments in ETFs. The adviser determines which ETFs to purchase based on factors such as price, liquidity, and track record. The adviser selects ETFs that are representative of an asset class, have a minimum five-year track record, adequate trading volume relative to the Fund's size.

The underlying ETFs that the Fund will invest in may target bonds with different maturities, durations, and quality requirements in connection with their investment strategies. Duration is a measure of price sensitivity of a debt security or a portfolio of debt securities to relative changes in interest rates. For instance, a duration of "five years" means that a security's or portfolio's price would be expected to decrease by approximately 5% with a 1% increase in interest rates (assuming a parallel shift in yield curve). Maturity is the period during which its owner will receive interest payments on the investment. When the bond reaches maturity, the Fund is repaid its par, or face value. A bond's quality is a reference to the grade given to a bond by a rating service that indicates its credit quality. The rating takes into consideration a bond issuer's financial strength or its ability to pay a bond's principal and interest in a timely fashion. For instance, a "AAA" high-grade rated bond offers more security and lower profit potential (lower yield) than a "B-" rated speculative bond.

Credit Hedge Strategy

The Fund may invest up to 20% of the Fund's portfolio in derivatives. The derivatives overlay consists of purchasing exchange-traded and over the counter ("OTC") put and call options on equity indexes, ETFs, and by purchasing total return swaps. When the Fund purchases a call option, the Fund has the right, but not the obligation, to buy a stock or other asset at a specified price (strike price) within a specific time period. When the Fund purchases a put option, the Fund has the right, but not the obligation, to sell a stock or other asset at a specified price (strike price) within a specific time period. The Fund will invest in total return swaps that use investment grade or high yield debt instruments or investment grade or high yield indexes as reference assets and equity indexes or ETFs.

The adviser selects derivatives based upon its evaluation of relative value based on cost, strike price (price that the option can be bought or sold by the option holder) and maturity (the last date the option contract is valid) and will exercise or close the options based typically on maturity. The adviser anticipates purchasing and selling its derivatives on a monthly, quarterly, and annual basis, depending upon the Fund's rebalancing requirements and expiration dates. However, the adviser may rebalance the Fund's derivative portfolio on a more frequent basis for a number of reasons such as when market volatility renders the protection provided by the derivative strategy ineffective or a derivative position has appreciated to the point that it is prudent to decrease the Fund's exposure and realize gains for the Fund's shareholders. While the use of derivatives is intended to improve the Fund's performance, there is no guarantee that it will do so.

Principal Investment Risks: *As with all funds, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund's net asset value and price of shares and performance.*

The following describes the risks the Fund bears with respect to its investments. As with any fund, there is no guarantee that the Fund will achieve its goal.

Fixed Income Securities. When the Fund invests in fixed income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund, possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments.

Active Management Risk. The Fund is subject to the risk that the investment management strategy may not produce the intended results and may negatively impact Fund performance. The adviser's overlay strategy will not fully protect the Fund from declines in the market.

Derivatives Risk. The use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities.

Early Close/Trading Halt Risk. An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

Equity Risk. The net asset value of the Fund will fluctuate based on changes in the value of the equity securities held by the Fund. Equity prices can fall rapidly in response to developments affecting a specific company or industry, or to changing economic, political or market conditions.

ETF Structure Risks. The Fund is structured as an ETF and will invest in underlying ETFs. As a result, the Fund is subject to special risks, including:

- *Not Individually Redeemable*. The Fund's shares ("Shares") are not redeemable by retail investors and may be redeemed only by Authorized Participants at net asset value ("NAV") and only in Creation Units. A retail investor generally incurs brokerage costs when selling shares.

- *Trading Issues*. Trading in Shares on NYSE Arca, Inc. (the "Exchange") may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange which may result in the Shares being delisted. An active trading market for the Shares may not be developed or maintained. If the Shares are traded outside a collateralized settlement system, the number of financial institutions that can act as Authorized Participants that can post collateral on an agency basis is limited, which may limit the market for the Shares.

- *Market Price Variance Risk*. The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the Shares. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV.

    - In times of market stress, market makers may step away from their role market making in the Shares and in executing trades, which can lead to differences between the market value of the Shares and the Fund's NAV.

    - The market price of the Shares may deviate from the Fund's NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for the Shares than the Fund's NAV, which is reflected in the bid and ask price for the Shares or in the closing price.

    - In stressed market conditions, the market for the Shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Shares may, in turn, lead to differences between the market value of the Shares and the Fund's NAV.

- *Authorized Participant Risk.* Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as an Authorized Participant on an agency basis (i.e., on behalf of other market participants). To the extent that Authorized Participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Fund shares may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting. Authorized Participant concentration risk may be heightened for securities or instruments that have lower trading volumes.

Large Capitalization Risk. Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large capitalization companies has trailed the overall performance of the broader securities markets.

Leverage Risk. The use of leverage by the Fund, such as the use of options, will cause the Fund to incur additional expenses and magnify the Fund's gains or losses.

Limited History Risk. The Fund is a new ETF and has a limited history of operations for investors to evaluate.

Market and Geopolitical Risk. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolios may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, international conflicts, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on both the U.S. and global financial markets. The novel coronavirus (COVID-19) global pandemic and the aggressive responses taken by many governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines or similar restrictions, as well as the forced or voluntary closure of, or operational changes to, many retail and other businesses had negative impacts, and in many cases severe negative impacts, on markets worldwide. It is not known how long such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your Fund investment.

Option Risk. As the buyer of put and call options, the Fund risks losing the entire premium invested in the option if the Fund does not exercise the option.

Over-the-Counter Market Risk. Securities and options traded in over-the-counter markets may trade less frequently and in limited volumes and thus exhibit more volatility and liquidity risk, and the prices paid by the Fund in over-the-counter transactions may include an undisclosed dealer markup. The Fund is also exposed to default by the over-the-counter option writer who may be unwilling or unable to perform its contractual obligations to the Fund.

Swap Risk. Swaps are subject to tracking risk because they may not be perfect substitutes for the instruments they are intended to hedge or replace. Over the counter swaps are subject to counterparty default. Leverage inherent in derivatives will tend to magnify the Fund's losses.

Underlying Fund Risk. ETFs in which the Fund invests are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in the ETFs and may be higher than other funds that invest directly in stocks and bonds. Each of the ETFs is subject to its own specific risks, but the adviser expects the principal investments risks of such ETFs will be similar to the risks of investing in the Fund.

Performance: Because the Fund has only recently commenced investment operations, no performance information is presented for the Fund at this time. In the future, performance information will be presented in this section of the Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholder semi-annually. Updated performance information will be available at no cost by visiting www.simplify.us/etfs or by calling 1 (855) 772-8488.

Investment Adviser: Simplify Asset Management Inc.

Portfolio Managers: Harley Bassman, Managing Partner & Convexity Maven, Paul Kim, Chief Executive Officer of the Adviser, David Berns, Chief Investment Officer of the Adviser, and Michael Green, Managing Director and Chief Strategist of the Adviser, have each served the Fund as a portfolio manager since it commenced operations in February 2022. Mr. Kim, Mr. Berns, Mr. Bassman, and Mr. Green are jointly and primarily responsible for the management of the Fund.

Purchase and Sale of Fund Shares: The Fund will issue and redeem Shares at NAV only in large blocks of 25,000 Shares (each block of Shares is called a "Creation Unit"). Creation Units are issued and redeemed primarily in-kind for securities but may include cash. Individual Shares may only be purchased and sold in secondary market transactions through brokers. Except when aggregated in Creation Units in transactions with Authorized Participants, the Shares are not redeemable securities of the Fund.

Shares of the Fund are listed for trading on the Exchange and trade at market prices rather than NAV. Shares of the Fund may trade at a price that is greater than, at, or less than NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) when buying or selling shares in the secondary market.

Tax Information: The Fund's distributions generally will be taxable as ordinary income or long-term capital gains. A sale of Shares may result in capital gain or loss.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
