FUND SUMMARY – SIMPLIFY MARKET NEUTRAL EQUITY LONG/SHORT ETF

Investment Objective: The Simplify Market Neutral Equity Long/Short ETF (the “Fund” or “EQLS”) seeks to provide positive absolute returns and income.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries on the purchase and sale of Fund shares, which are not reflected in the tables and examples below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	1.00%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	1.00%

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$102	\$318	\$552	\$1,225

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 0% of the average value of its portfolio.

Principal Investment Strategies:

The Fund invests primarily in total return swaps that provide the returns, long or short, of a basket of common stocks. The companies in the swap basket are selected using a third-party, multi-factor quantitative ranking system based on machine learning. The ranking system seeks to identify the factors that are driving both positive and negative returns and classify securities based on forward-looking return expectations. The ranking system considers over 500 fundamental factors. The adviser selects securities based on analyses from the third-party research provider and aims to include the names of over 200 stocks with the best expected returns in the long basket and the names of over 200 stocks with lowest expected returns in the short basket. Machine learning is a form of computer program that analyses raw data and detects patterns and translates those patterns into mathematical formulas that can be used to forecast security prices.

The Fund has adopted a non-fundamental policy that, under normal circumstances, the Fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities. Equity securities include investments that provide long or short exposure to equity securities, including total return swaps, and equity futures contracts. The direct and indirect equity investments are primarily U.S. companies but may include companies from both emerging and developed foreign markets and may include companies of any market capitalization. The Fund also holds cash and invests in cash-equivalents (money market funds) or high-quality short term fixed income securities as collateral for the swaps and futures.

A market neutral strategy is one that seeks to provide profits during both rising and falling markets. The total return swaps provide the Fund equity exposure of approximately 200% long the stocks of companies exhibiting positive performance factors, and 200% short the stocks of companies exhibiting negative performance factors. The 200% long and short positions are not direct hedges and the adviser constructs the portfolio in a manner that it believes will achieve a market neutral result. Ordinary gains on swaps are generally considered income to the Fund, contribute to the income component of the Fund's investment objective and are considered absolute positive returns. Other investments that contribute to income include treasuries and income-generating collateral.

The Fund is an actively managed ETF. The adviser rebalances the Fund's portfolio monthly based on the third-party ranking system, may rebalance more frequently to reduce industry or company specific concentration or other risks, and may tactically shift the Fund's net long/short exposure to equity markets based on its proprietary research. The Fund is "market neutral" because of the equal notional exposure on the long and short side when the Fund's portfolio is rebalanced.

Principal Investment Risks: *As with all funds, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund's net asset value and price of shares and performance.*

The following describes the principal risks the Fund bears with respect to its investments. As with any fund, there is no guarantee that the Fund will achieve its goal.

Derivatives Risk. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities. Leverage inherent in derivatives will tend to magnify the Fund's losses if the derivative strategy is ineffective.

- *Total Return Swap Risk.* Leverage inherent in derivatives such as total return swaps will tend to magnify the Fund's losses if the price of the short positions rise or the price of the long positions fall.
- *Counterparty Risk.* The Fund invests in total return swaps and other derivative instruments with counterparties that are privately negotiated in the over-the-counter market. These contracts involve exposure to credit risk because contract performance depends, in part, on the financial condition of the counterparty. If the creditworthiness of the counterparty declines, the Fund may not receive payments owed under the contract, or such payments may be delayed and the value of agreements with the counterparty can be expected to decline, potentially resulting in losses to the Fund.

Equity Securities Risk. Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by the Fund may experience sudden, unpredictable drops in value or long periods of decline in value.

Leverage Risk. The use of leverage by the Fund will cause the Fund to incur additional expenses and magnify the Fund's gains or losses. The swaps provide returns 2x the returns of the underlying equities and therefore, losses are 2x that of a non-leveraged investment.

Active Management Risk. The Fund is subject to the risk that the investment management strategy may not produce the intended results and may negatively impact Fund performance.

Cash or Cash Equivalents Risk. At any time, the Fund may have significant investments in cash or cash equivalents. When a substantial portion of a portfolio is held in cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time. Additionally, in rising markets, holding cash or cash equivalents may adversely affect the Fund's performance and the Fund may not achieve its investment objective.

Early Close/Trading Halt Risk. An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent the Fund from buying or selling certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

Emerging Markets Risk. Investing in emerging markets involves not only the risks described below with respect to investing in foreign securities, but also other risks, including exposure to economic structures that are generally less diverse and mature, limited availability and reliability of information material to an investment decision, and exposure to political systems that can be expected to have less stability than those of developed countries.

ETF Structure Risks. The Fund is structured as an ETF and will invest in underlying ETFs. As a result, the Fund is subject to special risks, including:

- **Not Individually Redeemable.** The Fund's shares ("Shares") are not redeemable by retail investors and may be redeemed only by Authorized Participants at net asset value ("NAV") and only in Creation Units. A retail investor generally incurs brokerage costs when selling shares.
- **Trading Issues.** Trading in Shares on NYSE Arca, Inc. (the "Exchange") may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange which may result in the Shares being delisted. An active trading market for the Shares may not be developed or maintained. If the Shares are traded outside a collateralized settlement system, the number of financial institutions that can act as Authorized Participants that can post collateral on an agency basis is limited, which may limit the market for the Shares.
- **Market Price Variance Risk.** The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the Shares. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV.
- **Authorized Participant Risk.** Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as an Authorized Participant on an agency basis (i.e., on behalf of other market participants). To the extent that Authorized Participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Fund shares may be more likely to trade at a premium or discount to net asset value and possibly face trading halts or delisting. Authorized Participant concentration risk may be heightened for securities or instruments that have lower trading volumes.
 - In times of market stress, market makers may step away from their role market making in the Shares and in executing trades, which can lead to differences between the market value of the Shares and the Fund's NAV.
 - The market price of the Shares may deviate from the Fund's NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for the Shares than the Fund's NAV, which is reflected in the bid and ask price for the Shares or in the closing price.
 - In stressed market conditions, the market for the Shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Shares may, in turn, lead to differences between the market value of the Shares and the Fund's NAV.

Foreign Currency Risk. The Fund holds investments that provide exposure to non-U.S. currencies, currency exchange rates or interest rates denominated in such currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and your investment in the Fund may experience losses.

Foreign Exchange Risk. Because options held by the Fund may trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, there are likely to be deviations between the current price of a security and the security's last quoted price from the closed foreign market. This may result in premiums and discounts that are greater than those experienced by domestic ETFs.

Foreign Investment Risk. The Fund may invest in securities domiciled in countries outside the U.S. that may experience more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. companies.

Futures Risk. The Fund's use of futures involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) leverage risk (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the futures contract may not correlate perfectly with the underlying index. Investments in futures involve leverage, which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the adviser's expectation and may not produce the desired investment results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they are based."

Limited History of Operations Risk. The Fund is a new ETF and has a limited history of operations for investors to evaluate.

Market and Geopolitical Risk. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolios may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, climate change or climate related events, natural disasters, pandemics, epidemics, terrorism, international conflicts, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on both the U.S. and global financial markets.

Over-the-Counter Market Risk. Securities and options traded in over-the-counter markets may trade less frequently and in limited volumes and thus exhibit more volatility and liquidity risk, and the prices paid by the Fund in over-the-counter transactions may include an undisclosed dealer markup. The Fund is also exposed to default by the over-the-counter option writer who may be unwilling or unable to perform its contractual obligations to the Fund.

Small and Medium Capitalization Risk. The earnings and prospects of small and medium sized companies are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

Underlying Fund Risk. ETFs in which the Fund invests are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in the ETFs and may be higher than other funds that invest directly in stocks and bonds. Each of the ETFs is subject to its own specific risks, but the adviser expects the principal investments risks of such ETFs will be similar to the risks of investing in the Fund.

U.S. Treasuries Risk. U.S. Treasury obligations are backed by the “full faith and credit” of the U.S. government and generally have negligible credit risk. Securities issued or guaranteed by federal agencies or authorities and U.S. government-sponsored instrumentalities or enterprises may or may not be backed by the full faith and credit of the U.S. government.

U.S. Treasury Market Risk. The U.S. Treasury market can be volatile, and the value of instruments correlated with these markets may fluctuate dramatically from day to day. U.S. Treasury obligations may provide relatively lower returns than those of other securities. Similar to other debt instruments, U.S. Treasury obligations are subject to debt instrument risk and interest rate risk. In addition, changes to the financial condition or credit rating of the U.S. Government may cause the value of U.S. Treasury obligations to decline.

Performance: Performance information will be available in the prospectus after the Fund has been in operation for one full calendar year. Past performance is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost by visiting www.simplify.us/etfs or by calling 1 (855) 772-8488.

Investment Adviser: Simplify EQLS LLC (the “Adviser”).

Portfolio Managers: David Berns, Chief Investment Officer of the Adviser; Paisley Nardini, Asset Allocation Strategist of the Adviser; and David Jackson, Vice President of Portfolio Management of the Adviser serve as portfolio managers of the Fund. Dr. Berns, and Mr. Jackson have each served the Fund as a portfolio manager since it commenced operations. Ms. Nardini has served the Fund as a portfolio manager since November 2024. Dr. Berns, Ms. Nardini, and Mr. Jackson are jointly and primarily responsible for the management of the Fund.

Purchase and Sale of Fund Shares: The Fund will issue and redeem Shares at NAV only in large blocks of 25,000 Shares (each block of Shares is called a “Creation Unit”). Creation Units are issued and redeemed primarily in-kind for securities but may include cash. Individual Shares may only be purchased and sold in secondary market transactions through brokers. Except when aggregated in Creation Units in transactions with Authorized Participants, the Shares are not redeemable securities of the Fund.

Shares of the Fund are listed for trading on the Exchange and trade at market prices rather than NAV. Shares of the Fund may trade at a price that is greater than, at, or less than NAV. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) when buying or selling shares in the secondary market. Recent information on the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads is available at www.simplify.us/etfs.

Tax Information: The Fund’s distributions generally will be taxable as ordinary income or long-term capital gains. A sale of Shares may result in capital gain or loss.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

INVESTMENT OBJECTIVE: The Fund seeks to provide positive absolute returns and income.

The Fund's investment objective may be changed by the Board of Trustees ("Board") without shareholder approval upon written notice to shareholders.

PRINCIPAL INVESTMENT STRATEGIES:

The Fund invests primarily in total return swaps that provide the returns, long or short, of a basket of common stocks. The companies in the swap basket are selected using a third-party, multi-factor quantitative ranking system based on machine learning. The ranking system seeks to identify the factors that are driving both positive and negative returns and classify securities based on forward-looking return expectations. The ranking system considers over 500 fundamental factors. The Adviser selects securities based on analyses from the third-party research provider and aims to include the names of over 200 stocks with the best expected returns in the long basket and the names of over 200 stocks with lowest expected returns in the short basket. Machine learning is a form of computer program that analyses raw data and detects patterns and translates those patterns into mathematical formulas that can be used to forecast security prices.

Under normal circumstances, the Fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities. Equity securities include investments that provide long or short exposure to equity securities, including total return swaps, and equity futures contracts. The direct and indirect equity investments are primarily U.S. companies but may include companies from both emerging and developed foreign markets and may include companies of any market capitalization. The Fund also holds cash and invests in cash-equivalents (money market funds) or high-quality short term fixed income securities as collateral for the swaps and futures.

A market neutral strategy is one that seeks to provide profits during both rising and falling markets. The total return swaps provide the Fund equity exposure of approximately 200% long the stocks of companies exhibiting positive performance factors, and 200% short the stocks of companies exhibiting negative performance factors. The 200% long and short positions are not direct hedges and the Adviser constructs the portfolio in a manner that it believes will achieve a market neutral result. Ordinary gains on swaps are generally considered income to the Fund, contribute to the income component of the Fund's investment objective and are considered absolute positive returns. Other investments that contribute to income include treasuries and income-generating collateral.

The Fund is an actively managed ETF. The Adviser rebalances the Fund's portfolio monthly based on the third - party ranking system, may rebalance more frequently to reduce industry or company specific concentration or other risks, and may tactically shift the Fund's net long/short exposure to equity markets based on its proprietary research. The Fund is "market neutral" because of the equal notional exposure on the long and short side when the Fund's portfolio is rebalanced.

Non-Fundamental Investment Policy:

The Fund's 80% policy is non-fundamental and may be changed by the Board, without shareholder approval, upon 60 days' prior notice to shareholders.

Temporary Defensive Positions:

From time to time, the Fund may take temporary defensive positions, which are inconsistent with the Fund's principal investment strategies, in attempting to respond to adverse market, economic, political, or other conditions. For example, the Fund may hold all or a portion of its assets in money market instruments, including cash, cash equivalents, U.S. government securities, other investment grade fixed income securities, certificates of deposit, bankers' acceptances, commercial paper, money market funds and repurchase agreements. While the Fund is in a defensive position, the opportunity to achieve its investment objective will be limited. If the Fund invests in a money market fund, the shareholders of the Fund generally will be subject to duplicative management fees. Although the Fund would do this only in seeking to avoid losses, the Fund will be unable to pursue its investment objective during that time, and it could reduce the benefit from any upswing in the market.

PRINCIPAL INVESTMENT RISKS:

All funds take investment risks. Therefore, it is possible to lose money by investing in the Fund. The principal risks that may reduce the Fund's returns include the following:

Active Management Risk. The Fund is subject to the risk that its investment management strategy may not produce the intended results. There can be no assurance that the securities selected by the adviser will produce positive returns.

Cash or Cash Equivalents Risk. At any time, the Fund may have significant investments in cash or cash equivalents. When a substantial portion of a portfolio is held in cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time. Additionally, in rising markets, holding cash or cash equivalents may adversely affect the Fund's performance and the Fund may not achieve its investment objective.

Counterparty Risk. The Fund may engage in transactions in securities and financial instruments that involve counterparties. Counterparty risk is the risk that a counterparty (the other party to a transaction or an agreement or the party with whom the Fund executes transactions) to a transaction with the Fund may be unable or unwilling to make timely principal, interest or settlement payments, or otherwise honor its obligations. To limit the counterparty risk associated with such transactions, the Fund conducts business only with financial institutions judged by the Adviser to present acceptable credit risk.

Derivatives Risk. The Fund's use of derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) the risk that the counterparty to a derivative transaction may not fulfill its contractual obligations; (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index. Derivative prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships. Trading derivative instruments involves risks different from, or possibly greater than, the risks associated with investing directly in securities including:

Early Close/Trading Halt Risk. An exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may prevent a Fund from buying or selling certain securities or financial instruments. In these circumstances, a Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and may incur substantial trading losses.

Emerging Markets Risk. The Fund may invest in countries with newly organized or less developed securities markets. Investments in emerging markets typically involves greater risks than investing in more developed markets. Generally, economic structures in these countries are less diverse and mature than those in developed countries and their political systems tend to be less stable. Emerging market countries may have different regulatory, accounting, auditing, and financial reporting and record keeping standards and may have material limitations on Public Company Accounting Oversight Board (PCAOB) inspection, investigation, and enforcement. Therefore, the availability and reliability of information, particularly financial information, material to an investment decision in emerging market companies may be limited in scope and reliability as compared to information provided by U.S. companies. Emerging market economies may be based on only a few industries. As a result, security issuers, including governments, may be more susceptible to economic weakness and more likely to default. Emerging market countries also may have relatively unstable governments, weaker economies, and less-developed legal systems with fewer security holder rights. Investments in emerging markets countries may be affected by government policies that restrict foreign investment in certain issuers or industries. The potentially smaller size of securities markets in emerging market countries and lower trading volumes can make investments relatively illiquid and potentially more volatile than investments in developed countries, and such securities may be subject to abrupt and severe price declines. Due to this relative lack of liquidity, the Fund may have to accept a lower price or may not be able to sell a portfolio security at all. An inability to sell a portfolio position can adversely affect the Fund's value or prevent the Fund from being able to meet cash obligations or take advantage of other investment opportunities.

Equity Securities Risk. Equity securities are susceptible to general stock market fluctuations and to volatile increases and decreases in value. The equity securities held by a Fund may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors affecting securities markets generally, the equity securities of a particular sector, or a particular company.

ETF Structure Risks: The Fund is structured as an ETF and will invest in underlying ETFs. As a result, each Fund is subject to special risks, including:

- *Not Individually Redeemable.* The Fund's Shares ("Shares") are not redeemable by retail investors and may be redeemed only by the Authorized Participant at net asset value ("NAV") and only in Creation Units. A retail investor generally incurs brokerage costs when selling shares.
- *Trading Issues.* Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable, such as extraordinary market volatility. There can be no assurance that Shares will continue to meet the listing requirements of the Exchange, which may result in a Fund's shares being delisted. An active trading market for the Shares may not be developed or maintained. If the Shares are traded outside a collateralized settlement system, the number of financial institutions that can act as Authorized Participants that can post collateral on an agency basis is limited, which may limit the market for the Shares.
- *Market Price Variance Risk.* Individual Shares of the Fund that are listed for trading on the Exchange can be bought and sold in the secondary market at market prices. The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares. There may be times when the market price and the NAV vary significantly and you may pay more than NAV when buying Shares on the secondary market, and you may receive less than NAV when you sell those Shares. The market price of Shares, like the price of any exchange-traded security, includes a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. In times of severe market disruption, the bid-ask spread often increases significantly. This means that Shares may trade at a discount to NAV and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares. The Fund's investment results are measured based upon the daily NAV of the Fund over a period of time. Investors purchasing and selling Shares in the secondary market may not experience investment results consistent with those experienced by those Authorized Participants creating and redeeming directly with a Fund.
 - In times of market stress, market makers may step away from their role market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Shares and the Fund's NAV.
 - The market price for the Shares may deviate from the Fund's NAV, particularly during times of market stress, with the result that investors may pay significantly more or significantly less for Shares than the Fund's NAV, which is reflected in the bid and ask price for Fund shares or in the closing price.
 - In stressed market conditions, the market for the Shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Shares may, in turn, lead to differences between the market value of the Shares and the Fund's NAV.
- *Authorized Participant Risk.* Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as an Authorized Participant on an agency basis (*i.e.*, on behalf of other market participants). To the extent that Authorized Participants exit the business or are unable to proceed with creation or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, the Fund's shares may be more likely to trade at a premium or discount to NAV and possibly face trading halts or delisting. Authorized Participant concentration risk may be heightened for securities or instruments that have lower trading volumes.

Foreign Currency Risk. The Fund holds investments that provide exposure to non-U.S. currencies, currency exchange rates or interest rates denominated in such currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of Fund shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and your investment in the Fund may experience losses.

Foreign Exchange Risk. Because options held by the Fund may trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, there are likely to be deviations between the current price of a security and the security's last quoted price from the closed foreign market. This may result in premiums and discounts that are greater than those experienced by domestic ETFs.

Foreign Investment Risk. The Fund may invest in securities domiciled in countries outside the U.S. and Canada that may experience more rapid and extreme changes in value than a fund that invests exclusively in securities of U.S. and Canadian companies. These companies may be subject to additional risks, including political and economic risks, civil conflicts and war, greater volatility, expropriation and nationalization risks, currency fluctuations, higher transaction costs, delayed settlement, and less stringent investor protection and disclosure standards than those of U.S. and Canadian markets. The potential departure of one or more other countries from the European Union could have significant political and financial consequences for global markets.

Futures Risk. The Fund's use of futures involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) leverage risk (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the futures contract may not correlate perfectly with the underlying index. Investments in futures involve leverage, which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the adviser's expectation and may not produce the desired investment results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they are based.

Leverage Risk. Using derivatives can create leverage, which can amplify the effects of market volatility on the Fund's share price and make the Fund's returns more volatile. The use of leverage may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. The use of leverage may also cause the Fund to have higher expenses than those of other funds that do not use such techniques.

Limited History of Operations. The Fund is a new ETF and has a limited history of operations for investors to evaluate. Investors in the Fund bear the risk that the Fund may not be successful in implementing its investment strategies, may be unable to implement certain of its investment strategies or may fail to attract sufficient assets, any of which could result in the Fund being liquidated and terminated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such a liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation. The adviser may not achieve its intended result in managing the Fund.

Market and Geopolitical Risk. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in a Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate change and climate-related events, pandemics, epidemics, terrorism, international conflicts, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund's portfolio. The novel coronavirus (COVID-19) global pandemic and the aggressive responses taken by many governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines or similar restrictions, as well as the forced or voluntary closure of, or operational changes to, many retail and other businesses had negative impacts, and in many cases severe negative impacts, on markets worldwide. It is not known how long such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your investment. Therefore, the Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates can have the same impact on all types of securities and instruments. In times of severe market disruptions, you could lose your entire investment.

Over-the-Counter Market Risk. Securities and options traded in over-the-counter markets may trade less frequently and in limited volumes and thus exhibit more volatility and liquidity risk, and the prices paid by the Fund in over-the-counter transactions may include an undisclosed dealer markup. The Fund is also exposed to default by the over-the-counter option writer who may be unwilling or unable to perform its contractual obligations to a Fund.

Small and Medium Capitalization Risk. The stocks of small and medium capitalization companies involve substantial risk. These companies may have limited product lines, markets or financial resources, and they may be dependent on a limited management group. Stocks of these companies may be subject to more abrupt or erratic market movements than those of larger, more established companies or the market averages in general.

Total Return Swap Risk. Leverage inherent in derivatives such as total return swaps will tend to magnify the Fund's losses if the price of the short positions rise or the price of the long positions fall.

Underlying Fund Risk. ETFs in which the Fund invests are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in the Underlying Funds and may be higher than other funds that invest directly in stocks and bonds. Each of the ETFs is subject to its own specific risks, but the adviser expects the principal investments risks of such ETFs will be similar to the risks of investing in the Fund.

U.S. Treasuries Risk. U.S. Treasury obligations are backed by the "full faith and credit" of the U.S. government and generally have negligible credit risk. Securities issued or guaranteed by federal agencies or authorities and U.S. government-sponsored instrumentalities or enterprises may or may not be backed by the full faith and credit of the U.S. government.

U.S. Treasury Market Risk. The U.S. Treasury market can be volatile, and the value of instruments correlated with these markets may fluctuate dramatically from day to day. U.S. Treasury obligations may provide relatively lower returns than those of other securities. Similar to other debt instruments, U.S. Treasury obligations are subject to debt instrument risk and interest rate risk. In addition, changes to the financial condition or credit rating of the U.S. Government may cause the value of U.S. Treasury obligations to decline.

PORTFOLIO HOLDINGS DISCLOSURE: A description of the Fund's policies and procedures regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information ("SAI").

CYBERSECURITY: The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its NAV; impediments to trading; the inability of the Fund, the adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invest; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT

INVESTMENT ADVISER: Simplify EQLS LLC, located at 10845 Griffith Peak Drive, 2/F, Las Vegas, NV 89135, serves as the Fund's investment adviser (the "Adviser"). The Adviser is registered with the SEC as an investment adviser under the Investment Advisers Act of 1940, as amended, and manages only investment companies. Since the inception of the Fund on June 12, 2023, until May 22, 2024, Simplify Asset Management Inc., located at 10845 Griffith Peak Drive, 2/F, Las Vegas, NV 89135, served as the investment adviser to the Fund and received a monthly management fee at the annual rate of 1.00% of the average daily net assets of the Fund.

Subject to the supervision of the Board of Trustees, the Adviser is responsible for managing the Fund's investments, placing trade orders and providing related administrative services and facilities under a management agreement between the Fund and the Adviser.

The Adviser is paid a monthly management fee at an annual rate of 1.00% of the average daily net assets of the Fund. The management agreement between the Fund and the Adviser provides that the Adviser will pay substantially all operating expenses of the Fund, except for any interest expenses, taxes, brokerage expenses, future Rule 12b-1 fees (if any), acquired fund fees and expenses, expenses incidental to a meeting of a Fund's shareholders, and the management fee. In addition to the excluded operating expenses, the Fund also pays non-operating expenses such as litigation and indemnification expenses and other expenses determined to be extraordinary by the Trust.

The aggregate fee amount that the Fund paid to the Adviser for the most recent fiscal year was 1.00% of the Fund's average daily net assets.

At a meeting held on November 29, 2023, the Board considered and approved a new investment management agreement between the Trust, on behalf of the Fund, and the Adviser. On April 5, 2024, a shareholder representing a majority of the outstanding voting securities of the Fund approved the agreement by written consent. An Information Statement, which included a discussion regarding the basis of the Board of Trustees' approval of the Adviser's management agreement with respect to the Fund, was provided to shareholders in an Information Statement dated April 11, 2024.

MANAGER-OF-MANAGERS EXEMPTIVE ORDER

The Trust and the Adviser have received an exemptive order from the SEC that permits the Adviser, subject to approval by the Board, to enter into sub-advisory agreements with one or more sub-advisers without obtaining shareholder approval. The exemptive order permits the Adviser, subject to the approval of the Board, to replace sub-advisers or amend sub-advisory agreements, including fees, without shareholder approval whenever the Adviser and the Board believe such action will benefit the Fund and its shareholders. The Adviser, subject to the oversight of the Board, is responsible for overseeing the Fund's sub-adviser(s) and recommending their hiring, termination and replacement.

PORTFOLIO MANAGERS

David Berns, PhD, is the chief investment officer and co-founder of the Adviser. Prior to co-founding the Adviser in 2020, he founded Portfolio Designer, LLC, a company that specializes in portfolio design and from 2018 to 2019 was a managing director at Nasdaq Dorsey Wright. Prior to joining Nasdaq Dorsey Wright, Inc., he founded and developed a company that specializes in proprietary trading. He has specialized in developing asset allocation, portfolio management, and risk management systems for managing private and institutional wealth. Dr. Berns has a PhD in Physics from the Massachusetts Institute of Technology in the field of Quantum Computation.

David Jackson has served as a Trader and Portfolio Manager of the Adviser since March 2022. From 2010 to 2021, Mr. Jackson served as Vice President on the Equities Trading and Portfolio Management teams at Pacific Investment Management Company, covering a wide variety of both passive and active investment strategies for retail and institutional clients.

Paisley Nardini is a portfolio manager and multi-asset strategist at Simplify, focusing on product innovation, thought leadership, and portfolio management. Before Simplify, she was a client portfolio manager and strategist at Invesco's Multi-Asset Solutions team. She also managed short-duration fixed income portfolios at Wells Capital and served as an institutional account manager at PIMCO. Paisley holds a BBA in financial markets from the University of Minnesota – Duluth, is a CFA charterholder, and a CAIA professional. She is also president of the CFA Society Orange County and serves on the investment committee for Second Harvest Food Bank of Orange County.

The SAI provides additional information about the Portfolio Managers' compensation, other accounts managed and ownership of Fund shares.

HOW SHARES ARE PRICED

The NAV of the Fund is determined at the close of regular trading (normally 4:00 p.m. Eastern Time) on each day the Exchange is open for business. NAV is computed by determining, the aggregate market value of all assets of the applicable Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The Exchange is closed on weekends and New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day ("Exchange Close"). The NAV takes into account, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for the Fund for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of Creation Units, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the Exchange on that day.

Generally, the Fund's portfolio securities, including securities issued by ETFs, are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. Securities that are not traded on any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity.

If market quotations are not readily available, securities will be valued at their fair market value as determined using the "fair value" procedures approved by the Board and the Adviser. The Board has selected the Adviser as its valuation designee. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board reviews the execution of this process at least annually to ensure the process produces reliable results. Independent pricing services may assist in calculating the value of each Fund's portfolio securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund.

In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the Exchange. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund's portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before a Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Funds' fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine NAV, or from the price that may be realized upon the actual sale of the security.

HOW TO BUY AND SELL SHARES

Shares of the Fund are listed for trading on the Exchange under the symbol EQLS. Share prices are reported in dollars and cents per Share. Shares can be bought and sold on the secondary market throughout the trading day like other publicly traded shares, and Shares typically trade in blocks of less than a Creation Unit. There is no minimum investment required. Shares may only be purchased and sold on the secondary market when the Exchange is open for trading. The Exchange is open for trading Monday through Friday and is closed on weekends and the following holidays, as observed: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

Authorized Participants that have entered into a contract with the Fund's distributor may acquire Shares from the Fund, and Authorized Participants may tender their Shares for redemption directly to the Funds, at NAV per Share only in large blocks, or Creation Units, of 25,000 Shares. Purchases and redemptions directly with the Funds must follow the Fund's procedures, which are described in the SAI. The Fund expect that purchases and redemptions of Creation Units will be made primarily through in-kind delivery of portfolio securities. The Fund may liquidate and terminate at any time without shareholder approval.

Share Trading Prices

The approximate value of Shares, an amount representing on a per share basis the sum of the current market price of the securities accepted by the Funds in exchange for Shares and an estimated cash component, will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a "real-time" update of the NAV per Share because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Funds are not involved in, or responsible for, the calculation or dissemination of the approximate value of the Shares, and the Funds do not make any warranty as to the accuracy of these values.

Book Entry

Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or "street name" form.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

Shares can only be purchased and redeemed directly from the Fund in Creation Units by Authorized Participants that have entered into a contract with the Funds' distributor. The vast majority of trading in Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Fund, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund's trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Fund, to the extent effected in-kind (*i.e.*, for securities), those trades do not cause the harmful effects that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund's ability to achieve its investment objective. However, direct trading by Authorized Participants is critical to ensuring that Shares trade at or close to NAV. The Fund also employs fair valuation pricing to minimize potential dilution from market timing. In addition, the Fund imposes transaction fees on purchases and redemptions of Shares to cover the custodial and other costs incurred by the Fund in effecting trades. These fees increase if an investor substitutes cash in part or in whole for securities, reflecting the fact that the Fund's trading costs increase in those circumstances. Given this structure, the Trust has determined that it is not necessary to adopt policies and procedures to detect and deter market timing of the Shares.

DISTRIBUTION AND SERVICE PLAN

The Fund has adopted a distribution and service plan ("Plan") pursuant to Rule 12b-1 under the 1940 Act. Under the Plan, the Fund is authorized to pay distribution fees to the distributor and other firms that provide distribution and shareholder services ("Service Providers"). If a Service Provider provides these services, the Fund may pay fees at an annual rate not to exceed 0.25% of average daily net assets, pursuant to Rule 12b-1 under the 1940 Act.

No distribution or service fees are currently paid by the Fund and will not be paid by the Fund unless authorized by the Trust's Board. There are no current plans to impose these fees. In the event Rule 12b-1 fees were charged, over time they would increase the cost of an investment in the Fund.

DIVIDENDS, OTHER DISTRIBUTIONS AND TAXES

Shares are traded throughout the day in the secondary market on a national securities exchange on an intra-day basis and are created and redeemed in-kind and/or for cash in Creation Units at each day's next calculated NAV. In-kind arrangements are designed to protect ongoing shareholders from the adverse effects on the Fund's portfolio that could arise from frequent cash redemption transactions. In a conventional mutual fund, redemptions can have an adverse tax impact on taxable shareholders if the mutual fund needs to sell portfolio securities to obtain cash to meet net fund redemptions. These sales may generate taxable gains for the ongoing shareholders of the mutual fund, whereas the Shares' in-kind redemption mechanism generally will not lead to a tax event for the Fund or its ongoing shareholders.

Ordinarily, dividends from net investment income, if any, are declared and paid quarterly by the Fund. The Fund distributes its net realized capital gains, if any, to shareholders annually. The Fund may also pay a special distribution at the end of a calendar year to comply with federal tax requirements.

No dividend reinvestment service is provided by the Fund. Broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by beneficial owners of the Fund for reinvestment of their dividend distributions. Beneficial owners should contact their broker to determine the availability and costs of the service and the details of participation therein. Brokers may require beneficial owners to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole shares of the Fund purchased in the secondary market.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

Taxes

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

- The Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

Taxes on Distributions

Distributions from the Fund's net investment income, including net short-term capital gains, if any, are taxable to you as ordinary income, except that the Fund's dividends attributable to its "qualified dividend income" (*i.e.*, dividends received on stock of most domestic and certain foreign corporations with respect to which the Fund satisfies certain holding period and other restrictions), if any, generally are subject to federal income tax for non-corporate shareholders who satisfy those restrictions with respect to their Shares at the rate for net capital gain. A part of the Fund's dividends also may be eligible for the dividends-received deduction allowed to corporations -- the eligible portion may not exceed the aggregate dividends the Fund receives from domestic corporations subject to federal income tax (excluding Real Estate Investment Trusts) and excludes dividends from foreign corporations -- subject to similar restrictions. However, dividends a corporate shareholder deducts pursuant to that deduction are subject indirectly to the federal alternative minimum tax.

In general, your distributions are subject to federal income tax when they are paid, whether you take them in cash or reinvest them in the Funds (if that option is available). Distributions reinvested in additional Shares through the means of a dividend reinvestment service, if available, will be taxable to shareholders acquiring the additional Shares to the same extent as if such distributions had been received in cash. Distributions of net long-term capital gains, if any, in excess of net short-term capital losses are taxable as long-term capital gains, regardless of how long you have held the Shares.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of your basis in the Shares and as capital gain thereafter. A distribution will reduce the Fund's NAV per Share and may be taxable to you as ordinary income or capital gain (as described above) even though, from an investment standpoint, the distribution may constitute a return of capital.

By law, the Fund is required to withhold 28% of your distributions and redemption proceeds if you have not provided the Fund with a correct Social Security number or other taxpayer identification number and in certain other situations.

Taxes on Exchange-Listed Share Sales

Any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses from sales of Shares may be limited.

Taxes on Purchase and Redemption of Creation Units

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered plus any Cash Component it pays. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received plus any cash equal to the difference between the NAV of the Shares being redeemed and the value of the securities. The Internal Revenue Service ("Service"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales" or for other reasons. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you purchased or sold and at what price. See "Tax Status" in the SAI for a description of the newly effective requirement regarding basis determination methods applicable to Share redemptions and each Fund's obligation to report basis information to the Service.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Funds. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in the Shares under all applicable tax laws. See "Tax Status" in the SAI for more information.

FUND SERVICE PROVIDERS

Bank of New York Mellon is the Fund's administrator, transfer agent, custodian and fund accountant. It has its principal office at 240 Greenwich St., New York, NY 10286, and is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds.

Forside Financial Services, LLC (the "Distributor"), located at Three Canal Plaza, Suite 100, Portland, ME 04101, is the distributor for the shares of the Funds. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA").

Thompson Hine LLP, 41 South High Street, 17th Floor, Columbus, Ohio 43215, serves as legal counsel to the Trust.

Cohen & Company, Ltd., located at 1350 Euclid Ave., Suite 800, Cleveland, OH 44115, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Funds.

OTHER INFORMATION

Continuous Offering

The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Fund on an ongoing basis, a "distribution," as such term is used in the Securities Act of 1933, as amended (the "Securities Act"), may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker dealers who are not “underwriters” but are participating in a distribution (as contrasted to ordinary secondary trading transactions), and thus dealing with Shares that are part of an “unsold allotment” within the meaning of Section 4(3)(C) of the Securities Act, would be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker dealer firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with Shares that are part of an overallotment within the meaning of Section 4(3)(A) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to Shares are reminded that, under Rule 153 of the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that the prospectus is available at the Exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

Dealers effecting transactions in the Shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.

Householding: To reduce expenses, you may elect to have the Fund mail only one copy of the prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please contact your financial institution.

Certain Conditions on Certain Shareholder Legal Actions

Pursuant to the Trust’s primary governing document, the Agreement and Declaration of Trust, shareholders wishing to pursue a derivative action (a suit brought by a shareholder on behalf of a fund) are subject to various conditions including: (i) Trustees must have a reasonable amount of time to assess a request for action, (ii) at least 10% of shareholders must participate in the action, (iii) expenses of a failed action are borne by the complaining shareholders. However, these provisions do not apply to actions brought under federal securities laws. In addition, all shareholder legal complaints must be brought in courts of the State of Delaware sitting in Kent County and the United States District Court for the District of Delaware, which may be inconvenient for some shareholders.

FINANCIAL HIGHLIGHTS

The following financial highlights are intended to help you understand the financial history of the Fund for the past five years, or since inception if the life of the Fund is shorter. Certain information reflects financial results for a single Fund Share. The total returns in this table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). The information for various periods ended June 30 has been audited by Cohen & Company, Ltd., the Fund's Independent Registered Public Accounting Firm, whose reports, along with the Fund's financial statements, are included in the June 30, 2024 Annual Report of the Trust, which is available free of charge, upon request.

	Year Ended June 30, 2024	Period Ended June 30, 2023 ^(a)
Simplify Market Neutral Equity Long/Short ETF		
Selected Per Share Data		
Net Asset Value, beginning of period	\$ 24.43	\$ 25.00
Income (loss) from investment operations:		
Net investment income (loss) ^(b)	1.02	0.04
Net realized and unrealized gain (loss)	0.12	(0.61)
Total from investment operations	1.14	(0.57)
Less distributions from:		
Net investment income	(1.84)	—
Return of capital	(0.15)	—
Total distributions	(1.99)	—
Net Asset Value, end of period	\$ 23.58	\$ 24.43
Total Return (%)	5.19	(2.29) ^(c)
Ratios to Average Net Assets and Supplemental Data		
Net Assets, end of period (\$ millions)	\$ 156	\$ 4
Ratio of expenses (%)	1.00	1.00 ^(d)
Ratio of net investment income (loss) (%)	4.33	4.02 ^(d)
Portfolio turnover rate (%) ^(e)	0	0 ^(e)

(a) For the period June 14, 2023 (commencement of operations) through June 30, 2023.

(b) Per share numbers have been calculated using the average shares method.

(c) Not annualized.

(d) Annualized.

(e) Excludes the impact of in-kind transactions related to the processing of capital share transactions in Creation Units.
